PROFILE

I enjoy working on different projects that help me learn new skills and improve my knowledge. I like being in environments where I can keep learning, work with others, and take on new challenges. I am eager to apply what I know, build practical experience, and contribute to meaningful work. I look forward to learning from experienced professionals, supporting the team's goals, and growing both personally and professionally.

EDUCATION

Bachelor of Engineering, Ballari Institute of Technology and Management

09/2023 – present

Branch: Artificial Intelligence & Machine Learning

Ballari, India

CGPA: 8.6

Pre-University Course, Nandi PU College, Ballari

2021 – 2023

Board: PUE Karnataka

Ballari, India

Percentage:90/ 100

Secondary School Education, Nandi International School, Ballari

2020 – 2021

Board: CBSE

Ballari, India

Percentage:90.24/ 100

SKILLS

Programming Languages

Python.

Frameworks & Libraries

Flask, Pandas, Numpy, Matplotlib, Turtle.

Database Management

My SQL.

App and Web Development

Android studio, JavaScript, HTML, CSS.

Tools & Productivity

GitHub, Figma, Canva.

LANGUAGES

• English

• Hindi

• Kannada

• Telugu

ACHIVEMENTS

Hackathon Participation

- Participated in AGENT HACK, a 8-Hr National Hackathon conducted by Kristu Jayanthi (Deemed to be University), Bengaluru.

Hackathon Participation

- Participated in HACKB25, a 12-Hr Hackathon organized by Ballari Institute of Technology and Management, Ballari.

PROJECTS

FixQuick AI | RAG-Based Appliance Troubleshooting Platform

Tech Stack: Python, FastAPI, React, TypeScript, Gemini API, ChromaDB, PyMuPDF, SQLite

- Built a RAG-based appliance troubleshooting assistant using manuals as the knowledge source.
- Developed document retrieval using PDF extraction, chunking, BGE embeddings, ChromaDB, and reranking.
- Generated source-aware responses with document and page references to improve reliability.
- Implemented authentication, appliance management, manual Q&A, troubleshooting history, and feedback.

SignLink - Sign Language to Text Translator [🔗](#)

Tech Stack: HTML5, CSS3, JavaScript, Python, Flask, SQLite, TensorFlow.js, Teachable Machine, MobileNet, MediaPipe, Chart.js

- Built a real-time sign language translator using Teachable Machine, MobileNet CNN, and TensorFlow.js.
- Integrated MediaPipe Hands with invalid-input detection for reliable gesture recognition.
- Developed Flask + SQLite authentication, learning, quiz, and progress-tracking modules.
- Added interactive lessons, quizzes, and Chart.js performance visualization.

OpsPilot – AI-Powered IT Incident Detection & Automated Resolution Platform (Ongoing)

Tech Stack: Python, Flask, React.js, JavaScript, SQL, PostgreSQL, SQLAlchemy, Scikit-learn, Pandas, NumPy, Docker, Docker Compose, Git, GitHub

- Building an AIOps platform to detect anomalies and identify critical incidents from system logs.
- Implemented ML-based incident classification and root-cause analysis using Scikit-learn.
- Integrated IBM Watsonx.ai [🔗](#) for incident summaries, technical explanations, and remediation recommendations.
- Developed a React + Flask dashboard for incident tracking, severity monitoring, and resolution history.

FreshSense – AI-Based Food Freshness Detection & Shelf-Life Prediction (Ongoing)

Tech Stack: ESP32-CAM, Python, C/C++, OpenCV, TensorFlow, Keras, CNN, Computer Vision, Machine Learning, IoT

- Building an AI-IoT system for real-time food freshness monitoring and shelf-life prediction.
- Implemented CNN/MobileNet and OpenCV for image-based freshness and spoilage detection.
- Combined image predictions with temperature, humidity, gas, and weight sensor data.
- Developed a Flask backend with Supabase for prediction processing and historical data storage.

CERTIFICATES

Certifies System Administrator [🔗](#)

(issued by ServiceNow)

AWS Certified Cloud Practitioner [🔗](#)

(issued by AWS)

AWS Virtual Internship [🔗](#)

(issued by Smart Bridge)
